As a matter of practical fact, however, a mother's womb can only hold so much, and if there are multiple organisms developing, each is sure to be smaller than a single organism. The more organisms that develop, the smaller each one and, in the end, they will be too small to survive after delivery..An organ replacement would be grown and since it would have precisely the same genetic equipment as the old, the body would not reject it ?Surely that is the best possible application of cloning..Well, the genes are contained in the nucleus of the cell, which makes up a small portion of the total and is marked off by a membrane of its own. Outside the nucleus is the cytoplasm of a cell, and it is the material in the cytoplasm that provides the various chemicals that help serve to inhibit or stimulate die action of the genes.."Somewhere in Gateside." herself, it's much more dramatic. Song came slowly back to them and sat down, still blinded by a private vision. Crawford had a glimpse of it himself, and it scared him. And a glimpse of something else, something that could be important but kept eluding him..Singh jumped, then turned around, looked at the three officers. They were looking as surprised as he."Do you want to talk about it?".I look out at the crowd and it's like staring at the Pacific after dark; the gray waves march out to the horizon until you can't tell one from the other. Here on the stage, the crowd-mutter even sounds like the sea, exactly as though I was on the beach trying to hear in an eighteen-foot surf. It all washes around me and I'm grateful for the twin earpieces, reassured to hear the usual check-down lists on the in-house com circuit.But she went on relentlessly, deaf to me.
