

MAKERS OF MODERN MEDICINE

First, he wanted to visit this special site, a couple miles away, where some guy named Carver or Carter. Paul Lechat raised the Separatism issue again and looked for a while as if he would carry a majority as commercial lobbyists defected from the Kalens camp. But the timing of the moment was not in Lechat's favor, and Borftein torpedoed the motion fresh off the launching ramp. with a scathing depiction of them all allowing themselves to be chased off across the planet like beggars from somebody's back door. Ramisson, who had been heading the movement for unobstructed integration into the Chironian system, lodged a plea for restraint, but it was obvious that he knew the mood was against him and he was speaking more to satisfy the expectations of his followers than from any conviction that he might influence anything. The assembly listened dutifully and took no notice..control himself and to leave the grieving for safer times..Pernak knotted his brow, pursed his lips, then stretched them back to reveal his teeth. "Then those people should look after their own future instead of waiting for someone else to work it out for them. That's the old way. They have to learn to think the Chironian way." After a second of hesitation he added, '~that's what Eve and I are going to do. And where was the girl's brother, Lukipela, to whom she referred so mysteriously? Was he Preston. A pair of men's walking shoes appear new. He takes one of these from the closet, puts it on the floor. LESS THAN TWENTY-FOUR HOURS after the close call in Colorado, with the house fire and the. He went to the bed, leaned down to his sister, and kissed her damp cheek. If he had asked for water. To many people, the face of a victim of severe Down syndrome inspired pity, embarrassment, disquiet..The mention of antimatter reminded Colman of something. He sat back on the sofa and cast his mind back as he tried to pinpoint what. It reminded him of something Kath had said. The others stopped talking and looked at him curiously. And then it came to him. He cocked his head to one side and looked at Bernard. "Did you know that Chironians were modifying the Kuan-yin into an antimatter ship?" he asked.. "Enter, enter, Maiden Leilani, and come thou quickly to thy queen's side." .isn't the direction that they ought to be taking..until they have achieved total synergism..They departed less than five minutes later, leaving Carson and one of the other soldiers inside with the prisoners and two guards standing stiffly outside the door with everything in the corridor seeming normal. Hanlon took Wellesley, Borftein, and Lechat to a storeroom near the Communications Center where they could remain out of sight .Colman followed Driscoll to a machinery compartment on uppermost level where an emergency bulkhead door, unguarded but sealed from the outside and protected by alarm circuits, led through to the motor room of an elevator bank in the civic offices adjoining the Government Center. Colman traced, checked, and neutralized the alarms. Then he double-checked what he had done, and nodded to Driscoll, who was waiting by the door; Driscoll opened the latches and swung the door outward while Colman held his breath. The alarms remained inactive. Sirocco was waiting on the other side with Bernard Fallows, who was wearing engineer's coveralls and carrying a toolbox.. "We are aware of that," Otto said..out there until the Beagle Boys have hammered themselves into exhaustion.. "Say, half an hour?". CHAPTER TWENTY. "At forty, she was only seven years older than Noah. Another Woman this beautiful would inspire his.. "Give me one..". blue eyes. "Now don't you wish you could see me as a mutant?". Jean spun round and ran back to the elevator. Chiron was stealing her life, her children, her friends, and now even her husband. For an instant she wished that the Mayflower II would send down its bombs and wipe every Chironian off the surface of the planet. Then they would be able to begin again, cleanly and decently. Ashamed of the thought, she pushed it from her mind as she came back into the lounge. She gazed across at the cabinet on the far side, and after a moment of hesitation went over to pour a large, stiff drink..sand, across loose shale, between masses of sage and weather-sculpted thrusts of rock, zigging and. Bernard looked at him uncertainly. "I'm not with you, Jerry. Why should it escalate to anything like that? The Chironians don't have anything in that league anyway..". WELLESLEY STOOD TO deliver his final address from in front of the Mission director's seat at the center of the raised dais facing out over the Congressional Hall of the Mayflower if's Government Center. In it he recapitulated the events that had taken place since the Mission's arrival at Alpha Centauri, dwelled for a long time on the things that had been learned and the transformation of minds that had been brought about since then, paid tribute to those who had lost their lives to preserve those lessons, and elaborated on the promise that the future now held for everybody on the planet, referring to them pointedly as "Chironians" without making distinctions..consoling words for any situation, had known when she could smooth your hackled heart just by lovingly.. "And

"Excuse me," he said to the bargain-basement Thor as the hammer arced high over the hood again, and another pulse..Micky crazily thought of killer bees, which might also have caused the shrieking figure to perform these upon identifying him, as will the cowboys and their ilk. Once he's in custody, however, he won't be. CHAPTER TWENTY-FOUR. his hair..At that moment a waiter began clearing the dishes in readiness for the next course. "Have you heard the news from the surface?" he inquired as he stacked the plates and brushed a few breadcrumbs into a napkin with his hand..In spite of the news about the marriage, Micky clung to the hope that her newfound desire to act as so. In the top row of the tiers of seats at the far end beyond the platform, Colman could make out the erect, silver haired figure of Howard Kalens, and beside him Celia in a pale blue dress and matching topcoat. She had told Colman about Howard's compulsion to possess--to possess things and to possess people. He felt threatened by any thing or anyone that he couldn't command. Colman had thought it strange that so many people should look to somebody with such hang-ups as a leader. To lead, a man had to learn to handle people so that he could turn his back on them and feel safe about doing it. Celia refused to become another of Kalens's possessions, and she proved it to herself in the same way that Colman proved to himself that nobody was going to tell him what he was supposed to think. That was what happened when somebody set himself up so that he didn't dare turn his back. Colman didn't envy Kalens or his position or his big house in the Columbia District; Colman knew that he could always turn his back on the platoon without having to worry about getting shot. They should issue all the VIPs up in the benches M32s, Colman thought. Then they'd all shoot each other in the back, and everyone else could go home and 'think whatever they wanted to..real-estate salesmen, one of them might have whupped his ass just as a matter of principle.. "We feel we owe something, and we want to pay our way," Driscoll confirmed. "We don't want any free rides, but all we get are pieces of paper that aren't any good for anything here. What can you do?" "Well what do you know--I'm on the loose tonight," Paula said, giving Hanlon a cosy look.. "Thoroughly and repeatedly. There is no risk that the Mayflower II might be exposed at any time," Gaulitz answered..as a schoolgirl in another age might have been returned to one of the chairs around the dance floor at a. If he ever dreamed, he could convince himself that he's in a dream now, that this landscape seems every time." Finally he smiled..No, pup, no, no! Out, pup, out!..Sirocco didn't reply at once, then seemed to lose some internal battle with his better judgment. "Swley thought you were screwing around with Kalens's wife back on the ship." HOWARD KALENS WAS not amused..spare parts by a machine knacker..Repenting its larceny, the cloud surrendered the stolen moon, and Sinsemilla raised her slender arms..door in Micky's heart, a door that had for a long time been kept locked, barred, and bolted. Beyond lay. Micky said, "He abandoned my mother and me when I was three." "Ah." Leilani's eyes widened. "You're the twelve percenters." "Neither do I. But we can't just do nothing." "Then invoke the security provisions," Borftein said, shifting in his chair from weariness with the whole business. "It's a security matter, isn't it? The Chironians have left it to us by default, and it's their security at stake as well as ours. The Pagoda's only two years away. Somebody's got to take the helm in all this." "You'd have made a fine Minnie." The snake still coiled near the baseboard, under the window. Luminous eyes. Head weaving as if to the. Progressive phase-down of the main-drive bum was commenced, and slow pivoting of. the variable-attitude Ring modules initiated to correct for the effect of diminishing linear force from the~ reducing deceleration. No response received from the Chironians to a request for a schedule of the names, ranks, titles, and responsibilities of the planetary dignitaries assigned to receive the Mayflower II's official delegation on arrival..four rioters were left behind with sore heads or other minor injuries. While the Company medic began cleaning up the injured and Sirocco stood talking with the SD commander a short distance away, Colman watched Kalens's limousine drive away in the opposite direction and disappear. That was how it had always been, he could see now. For thousands of years men had bled and died so that others might be chauffeured to their mansions. They had sacrificed themselves because they had never been able to penetrate the carefully woven curtain that obscured the truth--the curtain that they had been conditioned not to be able to see through or to think about. But the Chironians had never had the conditioning..swivels on his stool, putting his back to Curtis, and struggles to master his emotions. Although to all. police roadblock to stop traffic and provide an opportunity to steal from motorists. Therefore, Curtis. not paying for it--not a cent's worth of any of it. "They will," Rastus replied. "How?" Rastus looked mildly surprised. "They'll find a way," he said..STEVE. "They'd tell you modesty was a better virtue too," Colman said..~Driscoll was feeling more relieved. If what he had seen so far was anything to go by, the Chironians weren't going to start any trouble. He'd had to bite his tongue in order to keep a straight face back in the antechamber by the ramp, and it was a miracle that nobody important had heard Stanislaw sniggering next to him. The Chironians were okay, he had decided. Everything would be okay.. provided that ass-faces like Farnhill didn't go and screw things up..Kalens looked at him calmly for a few seconds, then nodded. "Very well. I withdraw the statement and apologize." "Look, I-I didn't mean to bust into anything," lay stammered. "I mean, if you and her are..." "A shuttle's lifting off from Bay Five at 2130," she said. "I'll be coming off it about thirty minutes before it leaves. All I need, is to get over into Chironian territory. I can make it on my own from there." "I suppose all this seems a bit strange to you folks," Rastus noted. "But with the machines providing everything back in the days

You'll get used to it." to with those seven dwarves? which isn't a Disney sort of thought." Two hundred thousand miles away on the rugged, pockmarked surface of Chiron's other moon, Romulus, two enormous covers, whose outer surfaces matched the surrounding terrain, swung slowly aside to uncover the mouth of a two-hundred-foot-diameter shaft extending two miles vertically through the solid rock. The battery of accelerator rings in the chambers surrounding the base of the shaft was already charged with dense antimatter streams circulating at almost the speed of light..won't draw the man's attention as much as will the movement of the door closing..identify a reason for this almost sweet anticipation. Not now. Neither fear nor anger, nor even this unwanted new knowledge."Carson doesn't know what to do with it," Driscoll."Why do people follow leaders?" Pernak replied. "For collective-strength. What do you need collective strength for? Because strength ultimately gets to control the wealth and to impose ideas. But why does a race of millionaires need leaden if it already has all the material wealth it needs, and isn't interested in imposing ideas on anyone because nobody ever taught it to? The Chironians don't. There isn't anything to scare them with. You won't start any crusades down there because they won't take any notice."Leilani had no clue to the meaning of her mother's words. From experience she knew that purposefully."Probably this lemonade," said Leilani.."We're going to have to talk about this, Jay." Bernard's voice was very serious. "I was teasing, really," Murphy said. "With a flyer up overhead, there's no way they'd be likely to get near anybody. But it's customary to go armed when you're not in places like Franklin... just in case."Martian light and the dead snake, there was a peaceful quality to the moment that she savored for its.Colman stood near Hanlon in front of-the Third and Second platoons of D Company and a short distance behind Sirocco, well to one side of the main Army contingent Only a few of the Company were absent for one reason or another, conspicuous among them Corporal Swyley, who was in Brigade sick bay and looking forward to a turkey dinner; the standing order for a spinach-and fish diet had mysteriously erased itself from the administration computer's records. The dietician had been certain he'd seen something of the sort in there before, but conceded that perhaps he was confusing Swyley with somebody else. Swyley had agreed that there had been something like that in the records by saying he disagreed, and the dietician had misunderstood and decided to forget 'about the whole thing..Hammond place..Slessor recognized Bernard as one of Merrick's former officers. The Mayflower H's designers had included docking adapters for the shuttles to mate with the Kuan-yin's ports, and the Chironians had retained the original pattern in their modifications, so the shuttle would be able to connect without problems..He glances back into a blaze of headlights and sees the white-haired woman gazing out and down at him.embroidered on the left breast, Leilani entered in a rattle and clatter of steely leg brace, though she had."Serial killers," he whispers to Old Yeller. The flash of gamma rays ionized the upper atmosphere, and the sky above Chiron glowed in streak~ that extended for thousands of miles. Sensitive radiation-monitoring instruments were CHAP! "And I suppose we'll have to play along with Stormbel for the time being if we want to be free to move." He turned away and moved toward the far wall to think silently for a few moments longer, then wheeled about and nodded. "Okay. Bret, you have to leave for the base right away. Just hope that that Veronica comes off that shuttle, and use your own initiative to get her out. That's all you have to worry about so, on your way." Hanlon nodded and disappeared back through the Orderly Room. "Steve," Sirocco said. "Pick anyone you want to send to Franklin, and wet just have to leave the rest of that side of things to Kath. You vanish when you've done that, and do whatever you have to do to get Celia out and over to the Fallowses' place. When you've collected the other two people from there, take

them all to the post between the north checkpoint and the rear of the construction site by the freight yard. Maddock's section will be manning that sector from midnight to 0400. They know how to distract the SDs, and I'll make sure they're expecting you." Colman nodded and tuned to follow in the direction which Hanlon had gone. "Oh, and Steve," Sirocco called as a new thought struck him. Colman stopped at the door and looked back. "You say you know Fallows fairly well?".bottle on the dresser.. "I'm glad I wasn't alive then," Marie said from behind him. "I can't imagine whole cities burning. It must have been horrible." "The cloak-and-dagger aspect ought to be fun, and the sleuthing. And when you were a kid, didn't you have gangs with special passwords and secret signs that only a handful of very special pals were allowed into? I bet you did..".Bernard stopped, frowned, and looked around. The store was moderately busy; people strolled about examining things rather than acquiring very much. An exception was a couple on the far side whom he recognized as Terms from the Mayflower II, conspicuous for the three carts trailing them in convoy and loaded with everything imaginable.
