The sixteen Devastator missiles would be launched from the Battle Module while the Mayflower Ii was screened from the Kuan-yin's retaliatory fire. One salvo would be programmed to follow planet-grazing courses that would bring them up low and fast from points all around Chiron's rim, while the second salvo, launched a few minutes earlier, would swing wide and out into space to come back in at the Kuan-yin from various directions at the rear, the flights being timed so that they all converged upon the Chironian weapon simultaneously. A mass the size of the Kuan-yin could not maneuver rapidly, and the worst-case simulations run on the computers had shown an overwhelming margin in favor of the attack, whatever.THE TENSION THAT had been increasing since planetfall and the shock of the most recent news were showing on Wellesley's face when he rose to address a stunned meeting of the Mayflower II' s Congress later that morning. And as he seemed a shell of the man he had been, the assembly facing him was a skeleton of the body that had sat on the day when the proud ship settled into orbit at the end of its epic voyage. Some, such as Marcia Quarrey, had vanished without warning during the preceding weeks as Chiron's all pervasive influence continued to take its toll; a few down on the surface had been unable to return in time for the emergency session. Nevertheless, at short notice Wellesley had managed to scrape together a quorum. He told them of his intention; a few voices of protest and dissent had been heard; and now the legislators waited to hear the decision that to most of them was already a foregone conclusion.. "Cause birds eat bugs..". "That's okay," Colman said. "We just have to take some measurements." Without waiting for a reply he walked over to the door, opened it, poked his head in, called back to Stanislaw, "This is it. Where's Johnson?" and went inside. Stanislaw put down the toolbox and followed, then Colman came back out and squatted down to rummage inside it for something. Veronica appeared and went in with the packing roll, Stanislaw came out, Colman went back in with a measure, and a few yards away along the corridor Carson and Maddock managed to get the picture-crate stuck across an awkward corner. While the SD was half watching them, Fuller came up the stain to ask where Johnson was, Stanislaw waved in the direction of the doorway, and Fuller went in while Colman came out. Carson dropped his end."Is that just a copy file, or are you displaying the master schedule?" With a.In its natural condition a society was like an iceberg, eight*ninths submerged in crude ignorance and serving no useful purpose other than to elevate and support the worthy minority whose distillation and embodiment of all that was excellent of the race conferred privilege as a fight and authority as a duty. The calamity of 2021 had been the capsizing of an iceberg that had become top-heavy when too much~ of the stabilizing mass that belonged at its base had tried to climb above its center of gravity. The war had been the price of allowing shopkeepers to posture as statesmen, factory foremen as industrialists, and diploma-waving bohemians as thinkers, of equating rudimentary literacy with education and simpleminded daydreaming with proof of spiritual worth. But while the doctrines of the New Order were curing the disease in the West, a new epidemic had broken out on the other side of the world in the wake of the unopposed mushrooming of Asian prosperity that had come after the war. Mankind as a whole, it seemed, would never learn..we'll get there while the action is still hot. She looked up as Howard came out of the home. Her expression did not change. Their relationship was, and for all practical purposes always had been, a social symbiosis based on an adult recognition of the realities of life and its expectations, uncomplicated by any excess of the romantic illusions that the lower echelons clung to in the way that was encouraged for stability, security, and the necessity for controlled procreation. Unfortunately, the masses were needed to support and defend the structure. Machines had more-desirable qualities in that they applied

themselves diligently to their tasks without making demands, but misguided idealists had an unfortunate habit of exploiting technology to eliminate the labor that kept people busy and out of mischief. Too, the idealists would teach them how to think. That had been the delusion of the twentieth century; 2021 had been the consequence.. "And in any case, whatever would a bunch like that want to get together for?" Nanook asked.. Jay was beginning to see the connection. "Measures up with respect to what?" he asked. Bernard sat forward, his expression suddenly serious. "No, I didn't," he said. "Is that what they've been doing to it? How did.. " His voice trailed away silently.. out of sassy altogether, leaving them feeling more pity than delight.. Colman watched for a moment, then turned slowly back and began moving toward the bulkhead door. He didn't feel resentful, nor particularly surprised. He'd seen it all too many times before. Fallows wasn't a bad guy; somebody somewhere had jumped on him, that was all. "He might know all about how machines work," Colman murmured half-aloud to himself as he returned to the gallery outside the Bomb Factory. "But he doesn't understand how they think.. Bernard stood up, paced slowly across to stare at the tool rack on the far wall, and seemed to weigh something in his mind for a long time before replying. Eventually he emitted a long sigh and turned back to face Jean, who had moved a step inside the doorway. "We can still build it," he said. "But it doesn't quite work the way we thought then. Jerry was right, you know- this whole society has gone through a phase-change of evolution. You can't make it go backward again any more than you can turn birds back into reptiles.. " Bernard came a pace nearer. His voice took on a persuasive, encouraging note. "Look, I didn't want to say anything about this until I knew a little more myself, but we don't have to get mixed up with any of it at all- any of us. Or they'd build you one however you want it. How can you say no? We're going to become Chironians. And so will everybody else when they've gotten over the voyage. Then people like Kalens can yell all they want, but what can they do if there's nobody left to take any notice? It's as I said- you have to start thinking like Chironians.. " . The group at the west gate surrendered shortly afterward and turned out to be just a handful and a lot of decoy devices. The transporter was picked up on radar heading low and fast away across the Medichironian, and two Terran interceptors on standby at Canaveral base were dispatched in pursuit. They overtook it just as it was crossing the far shore, and turned it around by firing two warning missiles, then escorted it to Canaveral, where its occupants were taken into custody by SD's.. "Some of the Mayflower II's modules have sky-roofs with steel outer shutters, don't they," Kath said.. Shot dinnerware explodes in noisy disharmonious chords; bullet-plucked metal racks produce jarring.. The capsule arrived, and Jay fell silent while he digested what Pernak had said. As they climbed inside, Jay entered a code into the~ panel by the door to specify their destination in the Jersey module, and they sat down on an empty pair of facing seats as the capsule began to move. After a short run up to speed, it entered a tube to exit from Maryland and passed through one of the spherical intermodule housings that supported the Ring and contained the bearings and pivoting mechanisms for adjusting the module orientations to the ship's state of motion. For a brief period they were looking out through a transparent outer shell at the immensity of the Spindle, seemingly supported by a web of structural booms and tie-bars three miles above their heads, with the vastness of space extending away on either side, and then they entered the Kansas module where the scene outside changed to animal grazing enclosures, level upon level of agricultural traits, fish

farms, and hydroponics tanks.. "Okay, maybe not." A dry sour laugh escaped her as she said, "But I sure have done my best to wash it. She took in the sight of her husband-his arms tanned and strong against the white of the casual shirt that he was wearing, his face younger, more at ease, but more self-assured than she could remember seeing for a long time-propped loosely but confidently against the frame of the door, and she smiled. Sirocco brought his elbows up level with his shoulders, stretched. for a few seconds, and sighed. After a short silence he cocked a curious eye in Colman's direction. "So... what's the latest with that cutie from Brigade?".. Although Jean felt sympathy for the soldier, the course that Kalens seemed to be advocating, with its prospect of more trouble and, inevitably, more killing, worried her even more. Why did it always have to be like this? she asked herself. All she wanted was to feel comfortable and secure, and to watch her children grow up to become decent, respectable, responsible adults who would weave themselves into the reassuring cocoon of familiarity around her-as much for their own future well-being as for hers. That much was hers to expect as her due because she had made sacrifices to earn it. It threatened nobody. So why should other people's squabbles which were not of her making now threaten her with sweeping it all away?. Bernard shook his head in protest and tore his eyes away to look at the screen still showing Kath. "You can't let this happen," he implored. "Those are your own people up there in Selene. This will just be the first example. Then it' II get worse.".. "No," the boy answered after a moment's reflection. "I could say fairies make the flowers up there grow, but the fact that the flowers are growing wouldn't prove that the fairies exist, would it?".. "I still don't like it," Borftein grumbled to Kalens after the meeting was over. Most of the adults he knew--the ones over twenty-five or so, anyway--seemed to feel an obligation to be sympathetic toward people like him, who had never experienced life on Earth. From what he had seen he wasn't sure that he'd missed all that much. Life on the Mayflower II was comfortable and secure with plenty of interesting things to do, and ahead lay the challenge and the excitement of a whole new unknown world.
