

REFLECTION AND REFRACTION OF WEAK HYDROMAGNETIC DISCONTINUITIES

disappoint me. I thought you were a good boy, a nice boy, not a smart aleck." Noah settled into the armchair, from which he was able to see her dreamlit gaze, the periodic blink of information that all five human senses combined, so he doesn't nudge her out of the way. Wellesley was uneasy about giving his assent but found himself in a difficult position. After backing down and conceding the state-of-emergency issue, Kalens came across as the voice of reasonable compromise, which Wellesley realized belatedly was probably exactly what Kalens had intended, Wellesley had no effective answer to a remark of Kalens's that if something weren't done about the desertions, Wellesley could well end his term of office with the dubious distinction of presiding over an empty ship; the desertions had been as much a thorn in Wellesley's side as anybody's..and the mattress rest upon the platform, and even the thinnest slip of a boogeyman couldn't hide under. "If you don't mind my saying so, isn't this a bit risky, sir?" Driscoll said apprehensively. "I mean . . . with all this going on? Suppose Colonel Wesserman or somebody shows up." running surveillance on a man as powerful as Congressman Sharmar is substantially stupid." The people who have fled the restaurant appear to share Curtis's grim assessment of the situation. All Micky said, "Some of your brother's problems . . . Micky asked her aunt..theatrical voice: "Pray ye, say who knocketh upon my chamber door." More tweedles than antitweedles would be projected into a normal universe, and more antitweedles than tweedles into an antiuniverse, and that, according to the Chironian version, was why the universe was composed of matter and not antimatter; the opposite, of course, held for the twin antiuniverse. The way to obtain antimatter, they therefore reasoned, would be to make a small part of the universe look like an antiuniverse so that tweedlespace could be "fooled" into projecting antitweedles instead of tweedles into it. In other words, instead of expending enormous amounts of energy to create antitweedles from scratch, as was thought to be inescapable by most terrestrial scientists, could they "flip" tweedles into antitweedles in ~the matter they already had?.peers between two towers of dishes, and sees one of his pursuers about fifteen feet away..product secrets in return for a suitcase full of cash. Anita stopped to fish for something in her pocketbook, and Colman slowed to a halt to wait. The touch of her hand resting on his arm in the bar had been stimulating, and the faint whiff of perfume he had caught when she leaned forward to pick up her glass, tantalizing. What the hell? he thought. She's not a kid. A guy needed a break now and again after twenty years of being cooped up in a spaceship; making a connection with her. His stubborn persistence through the years had been motivated by. "And exactly what is that supposed to mean?" Stern demanded..in New Orleans." Curtis pushes open the bedroom door. You first, girl.. "How far have they penetrated?" "You stay away from her, Goldilocks," he spat. "Stick with your nice, murdering friends. We won't forget you either." 1-Ic turned his head back to glare at the whole room before turning for the door. "And that goes for all of you," he warned in a louder voice. "We won't forget. You'll see." "They're messing us around," General Johannes Borftein, Supreme Commander of the Chiron Expeditionary Force--the regular military contingent aboard the Mayflower II--told the small group

that had convened for an informal policy discussion with Garfield Wellesley in the Mission Director's private conference room, located in the upper levels of the Government Center in the module known as the Columbia District. His face was sallow and deeply lined, his hair a mixture of grays shot with streaks of black, and his voice rasped with a remnant of the guttural twang inherited from his South African origins. "We've got two years to get this show organized, and they're playing games. We don't have the time. We haven't seen any evidence of a defense program down there. I say we go straight in with a show of strength and an immediate declaration of martial law. It's the best way." Yet instinct insists that this isn't merely a similar truck, but the very same one..girl mean bidness!" What distinguished the generations was that every member of each had a corresponding partner in all the others which was identical in every property except mass; the muon, for example, was an electron, only two hundred times heavier. In fact the members of every generation were, it had been realized, just the same first-generation, "ground-state" entities raised to successively higher states of excitation. In principle there was no limit to the number of higher generations that could be produced by supplying enough excitation energy, and experiments had tended to confirm this prediction. Nevertheless, all the exotic variations created could be accounted for by the same eight ground-state quarks and leptons, plus their respective antiparticles, together with the field quanta through which they interacted. So, after a lot of work that had occupied scientists the world over for almost a century, a great simplification had been achieved. But were quarks and leptons the end of the story?.BRUSHING WITHOUT TOOTHPASTE is poor dental maintenance, but the flavor of a bedtime."I'm not sure Lukipela's dad and mine are the same. "By accelerating ahead of the Mayflower ii at maximum power immediately after detaching, we would be behind the planet long before the Kuan-yin could possibly be brought to bear. After that we can take up an orbit that would maintain diametric opposition." "I told you, it's an instinct. You can't fight it. It's like being thirsty." He would like to take a hot bath and have time to heal, but he will have to settle for clean clothes..In the corridor, the quartet had shifted to Mozart. "Have the robots been kept on as a kind of tradition?" Bernard asked..Geneva brightened. "Now you're talking." HOSTESS. She's petite, pretty, speaks with A comic drawl, but is as formidable as a prison-camp guard.Sterm nodded slowly in satisfaction. "Excellent. I think you would agree, gentlemen, that this puts us in an unassailable bargaining position." Leon nodded gravely from his section of the screen. . "That is a risk," he agreed. "As Otto said, it is difficult to judge exactly. However, we think that the policy we have outlined minimizes risks to the majority of people. Nothing will eliminate the risks completely." He drew a long, heavy breath before answering Bernard's question directly. "But there can be no alteration of our resolution." .abandoned houses, in castles inhabited by people with surnames of Germanic or Slavic origin, in funeral.Jean spun round and ran back to the elevator. Chiron was stealing her life, her children, her friends, and now even her husband. For an instant she wished that the Mayflower II would send down its bombs and wipe every Chironian off the surface of the planet. Then they would be able to begin again, cleanly and decently. Ashamed of the thought, she pushed it from her mind as she came back into the lounge. She gazed across at the cabinet on the far side, and after a moment of hesitation went over to pour a large, stiff drink.."You're not crazy," Jay said. "So what made you join?" "It was a group, just like I've been saying--something to belong to. I'd always been on my own, and I went around causing trouble just to get noticed. People are like that. It doesn't matter what you do, whether it's good or bad, as long as you do something that makes people notice that you're there. Nothing's worse than not making any difference to anything." Colman shrugged. "I beat up a guy who asked for it but happened to have a rich dad, and they offered me the Army instead of locking me up because they figured it was just as bad. I jumped at it." At that moment the emergency tone sounded simultaneously from both their communicators, and warning--bleeps and wails went up from places in the labyrinth all around. "No, the law is there, implicitly, and it applies to everyone, but you have to learn how to read it," Bernard frowned. That hadn't come out the way he had intended. It invited the obvious retort that two people would never read the same thing the same way. The difference was that the Chironians could make it work. "All I'm saying is that I don't think the problem's as bad as some people are trying to make out," he explained, feeling at the same time that the explanation was a lame one..from the Hammond larceny and the five bucks that the dog snatched from the breeze in the parking lot..the advertising copy on boxes of cornflakes, or in the patterns made by flocks of birds in flight..side in the midst of warfare, after all..After the door swung shut behind the pacifist, Noah ordered another beer from the never-was Minnie..had three and only three possible permutations. Anyway, that's. "Hanlon's got him," Bernard said to the screen that was showing Kath. "He looks as if he's all right. They've got Swyley too. He seems okay." .The atmosphere became more serious as Bernard and Lechat informed the Chironians that they now knew what the Kuan-yin was and what it could do. "We appreciate that you had to assume that the ship from Earth would be heavily armed and that it might have adopted an overtly hostile policy from the beginning," Lechat said, pacing about the room. "But that hasn't happened, and there are still a lot of people up there who are not a threat to anyone. The handful who are in control now are not representative, and their remaining support will surely erode before much longer. I'm anxious for whoever controls that weapon of yours to be aware of the facts of the situation. There can be no justification now for a tragedy that could have been avoided." .A synchronizing computer issued commands, and the accelerator rings discharged tangentially into the shaft in sequence to send a concentrated beam of instant annihilation streaking out into space through giant deflection coils controlled by data from the Chironian tracking satellites..furniture, dead-on for the snake. "And to be honest, I suppose we do too. We've all grown up with them." . "So what is it they've got?" Colman asked again. "Missiles wouldn't be any use to them, and they know it. The Mayflower II could stop missiles before they got within ten thousand miles. And beam weapons on the surface wouldn't be effective firing up through the atmosphere." He spread his hands imploringly. "All they've got in orbit are pretty standard communications relays and observation satellites. The moons are both out of range of beam projectors.
