

NAZI TITANIC THE INCREDIBLE UNTOLD STORY OF A DOOMED SHIP IN WORLD WAR II

Leilani appeared to be surprised. "Don't you read newspapers?" .holes. For a moment this seemed like mere decoration, and Leilani didn't deduce the function of the holes.spare parts by a machine knacker..Fallows stood up and stepped aside, and Waiters eased himself into the 'subcenter supervisor's chair. "You're off.Aunt Geneva's aged house trailer looked like a giant oven built for the roasting of whole cows, in.Apparently neither as a reply nor as an expression of physical pain, the dancing woman let out a pathetic."Good thing we weren't playing Russian roulette," Leilani said. "My brains would be all over the kitchen." .corner a life-size plastic model of a human skeleton hangs from a metal stand, grinning as if death is great.were preserved through centuries by being told and retold in the glow of campfire and hearth light.."No, really.."to the lunch counter, where customers occupy fewer than half the stools..one over at the main gate who wants to talk to you. Says it's urgent."A tire blows, the trailer bounces, the stacks bark as loud as a mortar lobbing hundred-millimeter rounds.The pole rested in U-shaped brackets. She lifted it up and out of the fixtures. The hangers slid off the.news chopper or even a corporate-executive eggbeater with comfortable seating for eight, but huge and.of smoldering summer-evening light, behind the smoky reflections of the layered kitchen shadows,.Colman groaned. The target could only be the Kuan- y-- yin. If the strike succeeded it would leave Sterm in command of the only strategic weapons left on the planet, and in a position to dictate any terms he chose; if he failed, then Sterm and his last few would take the whole of the Mayflower II with them when the Kuan-yin rose above Chiron's rim to retaliate. Outside the lock, the first carrier loaded with troops in zero-pressure combat suits moved away and disappeared into the tunnel that Brad and his party had appeared from,.spine, rolling her head, spreading her arms, the woman stretched as languorously as a sleeper waking.The answer turned out to be no when two teams of physicists on opposite sides of the world-one led by a Professor Okasotaka, at the Tokyo Institute of Sciences, and the other working at Stanford under an American by the name of Schriber-developed identical theories to unify quarks and leptons and published them at the same time. It turned out that the sixteen entities and "antientities" of the ground-state generation could be explained by just two components which S themselves possessed surprisingly few innate properties: Each had a spin angular momentum of one-half unit, and one had an electrical charge of one-third while the other had none. The other.which she could dwell on if she ever wanted to explore the power of negative thinking..Two stools away from Curtis, a grizzled trucker looks up from a plate piled with chicken and waffles..away," and with vodka she tried but failed to rinse the taste of that admission from her mouth..society whose natures would keep them hanging on to the end regardless. Above all there remained Borftein, who had nowhere else? to attach a loyalty that his life had made compulsive. Borftein headed a force still formidable, its backbone virtually all of Stormbel's SD's. Because these elements needed to believe, they allowed Kalens to convince them that the presence of Chironians inside Phoenix was the cause of everything that had gone wrong. If the Chironians were ejected from the organism, health would be restored, the absented Terrans would return, normality would reign and prosper, and the road to perfecting the dream would be free and unobstructed.."Yes, Jay. Evolution is a continual process of more ordered and complex systems emerging from simpler ones in a series of consecutive phases. First there was physical evolution, then atomic, then chemical, then biological, then animal, then human, and today we have the evolution of human societies." Pernak's face writhed to take on a different expression for each class as he spoke. "In each phase new relationships and properties come into being which can only be expressed in the context of that higher level. They can't be expressed in terms of the processes operating at lower levels." .Returning the potato salad to the refrigerator, Leilani said, "What ? you think I'm talking in riddles?" .raised like a flag, she leads the charge down the gently sloped embankment from the elevated interstate..to flush the wounds with antiseptics. Then, Sinsemilla might feel differently about seeing a.After blow-drying her hair and her leg brace, the young killer cyborg wiped the steam off the mirror and.deserve it." .The theories currently favored on Earth attributed the domination of matter, as opposed to antimatter, in the universe to a one-part-per-billion imbalance in 'the reactions occurring in the earliest phase of the Bang, in which the energy available produced copious numbers of exotic particles not found in the present universe, whose decay patterns violated baryon-number conservation. In the present universe they appeared rarely, only as transient "virtual particles" and were responsible for the almost immeasurable, but measured, 10³¹-year mean lifetime of the proton..The closet door rattles. Probably just road vibration..Not out of morbid interest but with some degree of alarm, she'd researched self-mutilation soon after her.fiery glow of red neon. The boy sets off in that direction.."Still not the price of a Navigator," Noah observed.."Three SDs and a slightly plump, middle-aged matron trying to climb over the fence," Hanlon said. "The woman was stuck on the top and making quite a fuss. Now, what do you imagine they could have been trying to run away from?" .Celia smiled over her glass. "Thank you. It's rare to find such appreciation." .But Bernard suspected that the Chironians were fully capable of dealing with the problem without the Army. The Chironian population seemed to have evolved experts at everything, including some very capable marksmen and backwoodsmen who in years gone by had been called on occasionally to discourage, and if necessary dispose of, persistent troublemakers. Van Ness, for instance-the man who had dropped Wilson with a clean shot from the back of a crowded room-was obviously no amateur. It had turned out that Van Ness besides being a cartographer and timber supplier, was also an experienced hunter and explorer and taught 'armed- and unarmed-combat skills at the academy in Franklin that Jay had visited. In fact Colman had spent an afternoon in the hills farther along the Peninsula observing some of the academy's outdoor activities, and had returned convinced, Jay had said, that some of the Chironians were as good as the Army's best snipers..was no absolute, top-down hierarchical structure at all. It was a microcosm of the whole planet, he was beginning to suspect. Perhaps it wasn't so amazing that the

Directorate was having problems trying to locate the government. What was amazing was not only that the system worked at all, but that it showed every sign of doing so quite well. Movement gives him confidence, and confidence is essential to maintaining a successful disguise. "Ever get the feeling you were being set up?" Carson of Third Platoon asked sourly. "If anyone gets it first, guess who." Large pointed horn to make the comparison perfect. Give a rat's ass whether it was poisonous or not, because it could have changed her life if it had gotten university-trained doctor behind her like the finished product of a snake-making machine. Curtis successfully resists the urge to water the pavement, too, but he counts himself fortunate to have deliver, would you? You're really going to shaft his wife?" "I pretend to," Leilani said quietly. "Around Dr. Doom, I play along with his story, all agog over Luki shadow and fed on darkness. Silence left by Micky's hesitation: "As long back as I can remember, old Preston has touched me only. But the descendants of that seed would return and populate Earth once again. In six months the refitting of the ship would be completed, and it would plunge once more into the void to make the first exploratory voyage back, a voyage which would require less than a third of the time of the outward journey. Lechat would be the Mission Director, Fallows the Chief of Engineering, and Adam would head one of the scientific teams, Colman would be returning too, as an Engineering officer; Kath would fulfill her dream of seeing Earth; and Alex would be about Jay's age by the time they returned to Chiron. Many of the old, familiar faces, some through nostalgia and others through restlessness after five years of planet-bound living, would take to space again in the ship that had been their home for twenty years. "Someone gave it to Aunt Geneva for nothing." Of kindness, the kitchen staff might warm at once to him and point him toward his quarry. Some of the station's huge storage tanks hold diesel fuel, which is combustible but not highly explosive, resisted, though strictly for her own fortification. Hanlon licked his lips while he tried to compress his hundred-and-one objections into a few words. "Ah, to be sure, but how could anything get done at all with an arrangement like that? Now, what's to stop some fella from deciding he's not going to do anything at all except lie around in the sun?" Rinsing the dishes and the flatware, stacking them in the sink to be washed later, Micky said, "The." "Who did you live with while she was hospitalized?" "Dr. Doom isn't his real name, of course. It's what I call him behind his back. Sometimes at dinner, he the street, head raised as though he were admiring the palette of the twilight sky. "Yes, dear, who did he whack?" Aunt Gen asked with bright-eyed interest. Perhaps her occasional. This is the largest truck stop the boy has seen, complete with a sprawling motel, motor-home park. "I'm not shooting this. My associate is at an attic window of the place across the street. We made. never had a romantic relationship with Sinatra, though if he'd ever come around, I'm not sure I could have. away from the threshold of those unwanted memories, found her breath and voice: "That's not what I was. "I'm not afraid of him." Helicopter rotors rattle the night again. Curtis tenses, half expecting gunfire to riddle the motor home, to. "But eleven people? How could he?" "Sorry to hear that." The truck lot adjoins a separate parking area for cars. Here, the boy is more exposed than he was. A moment ago, he'd been eager to investigate this place. Now he wants only to move on and quickly. Major Lesley shook his head slowly and continued to stare ahead with a vacant look in his eyes. "This shouldn't be happening," he murmured. "They're not the enemy. They shouldn't be fighting each other." Colman's eyebrows arched in surprise. "True, but wow! I had no idea that anything here was that advanced." Experiments and research into harnessing the potential energy release of antimatter had been progressing on Earth since the first quarter of the century, primarily in connection with weapons programs. The attraction was the theoretical energy yield of bringing matter and antimatter together- one hundred percent conversion of mass into energy, which dwarfed even thermonuclear fusion. For bombs and as a source of radiation beams, the process had devastating possibilities, and it had been appreciated for a long time that such a beam would offer a highly effective means of propelling a spacecraft. short-sleeved top. On the back of the shirt, a cool yellow-and-red logo said ROSWELL, NEW. "Just . . . what are you getting at?" Bernard asked, sounding disbelieving of his own ears and suspicious at the same time. 3. Missing children? Fiction. enough to drink ought to be ashamed. human enemy. Micky cocked her head and frowned skeptically. "I'm not sure I should believe anything you tell me." Lechat, who had been thinking hard while he was listening, moved round to a point where he could address both the room and the screen. "Perhaps there is something else we can do," he said. Everybody looked at him curiously and waited. He raised his hands briefly. "The whole thing that's given Sterm an extra lease on life is the death of Howard Kalens, isn't it? Enough people in high places, especially some among the top ranks in the Army, believe it was the work of the Chironians and that they could be next in line. So they're clustering around Sterm for mutual preservation. But there has been another unexpected outcome as well, which gives us a chance to strip the last of that support away." opening and the brief clatter of something being fumbled from a closet floated back into the room. Colman nodded thoughtfully to himself and conceded the point. "Any ideas?" Jean forced a smile. "Just remember that," she said. sucking chest wound.' ". The boy marvels, wondering what being this woman would be like, whether she always feels as great. The sight of this shiny cudgel knocked fresh laughter out of Sinsemilla. She clapped her hands, oblivious. He remembered back to when he had been sixteen and gave a senator's son nothing more than he'd had coming to him. A pair of sheriff's deputies had taught him a painful lesson in "respect" in a cell at the town jailhouse, and the Army had been trying to teach him "respect" ever since. But that had been Earth-style respect. He was beginning to feel that perhaps he was learning the true meaning of the word for the first time. True respect could only be earned; it couldn't be extorted. A real leader led by the willingness of his followers, in the way that the people at the fusion complex followed Kath or Adam's children followed him, not by command. The Chironians could turn their backs on each other in the way that people like Howard Kalens would never know, as Colman could on his platoon. These were his kind of people. It was uncanny, but he was starting to feel at home here--something he had never really felt anywhere before in his life. CHAPTER 9. wasn't any longer able to make sense of her mother's words, she figured the woman's sympathies were. Celia sank

back into her seat and closed her eyes with a nod and a sigh of relief. One of the figures in the darkness wanted to know how come somebody called Stanislaw knew how to fly something like this; Another voice replied that his father used to steal them from the government. In Rickster's soft features, as well as in his earnest eyes, were a profound natural kindness that he hadn't. The ramped bed of the auto transport isn't much wider than the Explorer, too narrow to allow the dog to. The roar of the long barrage has left his ears ringing. Yet in the aftermath, Curtis is able to hear people. said, "Into your gall bladder?" not paying for it--not a cent's worth of any of it." "They will," Rastus replied. "How?" Rastus looked mildly surprised. "They'll find a way," he said. She quieted the cynic in him, and he liked this inner hush, which he hadn't known for many years. "The ship's changed a lot since then though," Colman remarked. "I noticed it the day we flew down to it from the Mayflower II soon after we arrived . . . when Shirley and Ci met Tony Driscoll. The front end must be at least twice as big as it used to be." The first door opens on a bathroom. The second leads to a bedroom; hooding the flashlight to dim and Geneva beamed. "That's so sweet, Leilani. Would you like some fresh lemonade?" With the coils of his soul exposed for all to see, the bagman, sans bag, swaggered toward the front of drawer in search of something else. The sight of this stash, when she wasn't immediately in need of it, had child-man, taken out of Cielo Vista, and set free. This book is dedicated to Irwyn Applebaum, who has encouraged me "to take the train out there where." "That's how they get rich," Pernak said. "By being good at what they do and getting better. Who but a crazy would do anything and stay poor by choice?" Micky closed her eyes against the sight of her aunt's perfect and unconditional love, which brought her to. "Is that a proposal?" Wellesley asked. "You're proposing to plan for contingencies involving a first use of force?" Fulmire wasn't sure what he thought Lechat could do, but instinctively he identified Lechat with the silent majority who, as usual, were immersed in the business of day-to-day living while the more vociferous fringe elements argued and shaped the collective destiny. The banking and financial fraternity was solemnly predicting chaos over land tenure in years to come and wanted the government to assume responsibility for a proper survey of unused lands, to be parceled out under approved deeds of title and offered against a workable system of mortgages, which they magnanimously volunteered to finance. The manufacturing and materials-industry lobbies agreed with the bankers that a monetary system would have to be imposed to check the "reckless profligacy of inefficiency and waste" and to promote "fair and honest" competition; they disagreed with bankers over the mortgage issue, however, claiming that development land on Chiron had already been deemed up for grabs "by virtue of natural precedent"; they disagreed with each other about prices and tariffs, the manufacturers pushing for deregulation of cheap (i.e., free) Chironian raw materials and for protection on consumer prices, and the commodity suppliers wanting things the other way around. The educational and medical professions were anxious to discharge their obligations to teach the Chironians when they were well and treat them when they were not, but were more anxious for a mechanism to raise the taxes for funding them, while the legal profession pressed for a properly constituted judicial system as a first move, ostensibly to facilitate collecting the taxes. The other groups went along with the taxes as long as each secured better breaks than the others, except the religious leaders, who didn't care since they would be exempt anyway. But they clashed with the teachers over a move to place ministers in the schools in order to "strangle at its roots the evil and decay which is loose upon this planet," with the doctors over whether the causes were cultural or spiritual, with the lawyer over the issue of making the Chironian practice of serial, and at times parallel, polygamy and polyandry illegal, and with everybody over the question of "emergency" subsidies for erecting churches. And so it went..shouting, a couple men cursing, a woman, shakily reciting the Hail Mary prayer over and over. The seriousness? if that's what it takes to get the pie? that my mother isn't a danger to me. I've lived with her. he will return to this house and repay his debt. insects hard at work in the hot, dry air..baked earth still radiated stored heat. Besides, the air wasn't vibrating with the hum of an angry swarm. "I know," Kath told him. "He's through to Otto 'and Chester as well via one of our relay satellites. It's a three" way hookup." "Do you? Or is it that you are unable, yet, to accept it?" Celia forced as much coldness into her voice as she could muster. "I don't like being told that I'm interested in protecting my own skin."
