

THE SOUTH AFRICAN MINING JOURNAL VOL 27 PART I JANUARY 26 1918

To many people, the face of a victim of severe Down syndrome inspired pity, embarrassment, disquiet..killers and are holding them for justice..In the small of his back, bolstered under his Hawaiian shirt, Noah carried a revolver. He didn't think he..Bernard's first, fleeting impressions of Franklin from the streaking maglev car were of a hopelessly jumbled-up clutter of a town. Unlike the neat and orderly models of urban planning that had replaced the heaps of American rubble during the recovery after the Lean Years--with business, entertainment, industrial, and residential sectors segregated by green belts and tidy landsculpting--everything in Franklin seemed to be intermingled with no discernible rhyme or reason. Buildings, towers, houses, and unidentifiable constructions of all shapes, sizes, and colors were packed together, overlapping and fusing in some places while giving way to clumps of greenery and trees in others. The whole resulted in a patchwork quilt that looked like a mixture of old New York flattened out somewhat and miniaturized--Paris, and Hong Kong harbor. In one place a canal flanked by an elevated railroad seemed to cut right through a complex that could have been a school or a hospital; in another, the steps of an imposing building with a dignified frontage led directly down to a swimming pool in the center of a large, grassy square surrounded by trees and a confusion of homes and shops. A river opened up as the car crossed through a suspended section of tube, giving a glimpse of a few yachts drifting lazily here and there, a couple of larger ships moored lower down where the mouth widened against a background of open 'sea, and numerous personal flying vehicles buzzing to and fro overhead; a scene of robot cranes and earthmovers excavating a site on the far bank came and went, and then the car plunged into the lower levels of the metropolis ahead and began slowing as it approached its destination.. "Very probably it was," Kath replied. "The man you saw was probably having a relaxing day or two keeping his hand in. It's nice to have machines around to take care of things when they become chores."..Bernard's eyes widened incredulously. "But if the Kuan-yin isn't finished, then what made the crater in Remus?"..He isn't aware of my associate in the attic."..Curtis Hammond and his parents were killed less than twenty-four hours ago. If by now the Colorado..hope of escape lies ahead..Eventually, Geneva asked, "What are we going to do?".. "Dr. Doom isn't his real name, of course. It's what I call him behind his back. Sometimes at dinner, he.".. "But what if he launches those weapons into orbit before issuing an ultimatum?" Bernard asked..On screen: the residential street in Anaheim. The camera tilted down from a height, focusing on the..own way, she loves you very much." Aunt Gen was childless, not by choice. "Baby, it's okay, see, baby, look."..Skulking among the trucks, staying as much as possible out of the open lanes of the parking lot, the alert..Jay frowned and looked mildly uncomfortable. "Sex?" he hazarded.. "So what is it they've got?" Colman asked again. "Missiles wouldn't be any use to them, and they know it. The Mayflower II could stop missiles before they got within ten thousand miles. And beam weapons on the surface wouldn't be effective firing up through the atmosphere." He spread his hands imploringly. "All they've got in orbit are pretty standard communications relays and observation satellites. The moons are both out of range of beam projectors. So what else is there?"..Good pup. Stay close..The mention of antimatter reminded Colman of something. He sat back on the sofa and cast his mind back as he tried to pinpoint what. It reminded him of something Kath had said. The others stopped talking and looked at him curiously. And then it came to him. He cocked his head to one side and looked at Bernard. "Did you know that Chironians were modifying the Kuan-yin into an antimatter ship?" he asked.. "So where do we go from here?" Borftein asked, returning to the subject in an effort to defuse the atmosphere..COLMAN LEFT THE Fallows house shortly before midnight with Bernard. Lechat, and Celia. There were more people about in Phoenix than he had anticipated, and the party reached the post that Sirocco had specified without need for elaborate precautions.. "That's right. I don't own a gun." Geneva's sudden smile was more radiant than the candlelight. "Now..haunting..Sirocco hesitated for a moment, then nodded reluctantly..as a quiver of light..Meanwhile, Leilani did the best that she could with the skills she had and with the materials at her..Bernard sighed. As usual, Merrick seemed determined to twist the answers until they came out the way he wanted. "Of course not," Bernard replied. "But I think people are exaggerating the situation. That incident was not representative of what we should expect. The Chironians act as they're treated. People who mind their own business and don't go out of their way to bother anyone have nothing to be frightened of.".. "You mean the way's clear right down to the Battle Module?" Colman asked..okay, too..Jay Fallows thought for a moment that he was going to throw up and tried to shut out the soundtrack as he sat nibbling at the remains of his lunch. An astronomy book lay propped open on the table in front of him. Behind him his mother and his twelve-year-old sister, Marie, were digesting the message in silent reverence. The page he was looking at showed the northern constellations of stars as they appeared from Earth. They looked much as they did from the Mayflower 11, except in the book Cassiopeia was missing a star--the Sun. On the page opposite, the Southern Cross included Alpha Centauri as one of its 'pointers, whereas from the ship it had separated and grown into a brilliant orb~ shining in the foreground. And the view from Earth didn't show Proxima Centauri at all--a feeble red dwarf Of less than a ten-thousandth the Sun's luminosity and invisible without a telescope, but now quite close to and ;easily seen

A universe provided, in effect, a screen upon which the same projections were repeated over and over again as a consequence of the separation of the space and time dimensions of the screen itself, which of course was why every dum was the same as every other dum, and every dee the same as every other dee. It was as if a typewriter created paper as it typed on, leaving the planar inhabitants of the flat universe that it had brought into being to ponder why all the characters encountered serially in their own "flat-time" should have exactly the same form.. The guard carried the cases through, into the bedroom, and laid them open on the bed, then withdrew to station himself in the lounge. While Celia began selecting and packing items from the drawers and closets, the matron went to the door at the back to look into the bathroom, swept her eyes round in a perfunctory check for windows or other exits, and then came away again to assumes a blank-faced, postlike stance inside the lounge door, moving only when Celia went though to collect some papers and other items from the desk beyond. Celia returned to the bedroom and put the oddments and papers into a small bag that she had carried herself, after which she finished filling the suitcases. Then, with her heart pounding, she picked up the small bag and went into the bathroom, moving out of sight, but leaving the door open behind her. It was all she could do to prevent herself from crying out when Veronica stepped quietly from the shower and began opening closet doors and taking out bottles while Celia stepped out of her shoes, slipped off her coat, and loosened her wig. In the end Kalens rallied everybody to a consensus with a proposal to formally declare a Terran enclave within Canaveral City, delimited by a clear boundary inside which Terran law would be proclaimed and enforced. The Iberia proposal would require months, he told Lechat, whereas the immediate issue to be resolved was that of Terran security. In any case, it could hardly be carried out without an electoral mandate. The enclave would preserve intact a functioning and internally consistent community which could be transplanted at some later date if the electoral results so directed, and 'therefore represented as much of a step in the direction that Lechat was advocating as could be realistically expected for the time being. "Bad?" she asked, glancing toward Laura's room..Bernard Fallows leaned alongside the sliding glass door in the living room and stared out at the lawn behind the apartment while he wondered to himself when he would be free to begin his new career at Port Norday. He had broached the subject to Kath, as he now knew she had guessed he would, and she had told him simply that the people there who had met him were looking forward to working with him. But he had agreed with Pernak and Lechat that a nucleus of people capable of taking rational control of events would have to remain available until the last possibility of extreme threats to the Chironians went away, and that Ramisson's Integrationist platform, to which Lechat had now allied himself, needed support to allow the old order to extinguish itself via its own processes..Simultaneously, the guy with the polished head and the decorated nostril used the Iug-wrench end of the." Farnhill's staff had given up trying to get the Chironians to provide an official list of who would be greeting the delegation. In the end they had simply advised the Kuanyin when the shuttle would arrive and resigned themselves to playing things by ear after that. The Chironians had agreed readily enough, which was why the orders issued that morning had called for a reduced alertness level Kalens's delegation

had met with an equal lack of success in dealing with Franklin, and had elected finally to go to the surface on the same basis as the delegation to the Kuan-yin, but with more elaborate preparations and ceremonies.
