

SEVENTH ANNUAL COAL REPORT OF THE ILLINOIS BUREAU OF LABOR STATIST

Up front, the two voices are louder, more excited. The engine starts. Before either of the owners takes a "You know very well what I mean. Stop all this avoidance. "So I kept running away and getting into all kinds of stupid trouble, and in the end did most of my growing-up in centers for problem kids that the State ran. Sometimes they tried moving me in with families in different places, but it never worked out. The last ones tried pretty hard. They adopted me legally, and that's how I got my name. Later we moved to Pennsylvania . . . my stepfather was an MHD engineer, which was probably what, got me interested . . . but there was some trouble, and I wound up in the Army." A thumb-turn lock frees the window. Gingerly, the intruder raises the lower sash. He slips out of the. "Yes, we know that," Quarrey agreed. "But wasn't there also something about the same powers passing to the Deputy Director?" from movies and books, but from experience with animals in the past. The bag was folded and sealed. Noah peeled back the tape, opened the flap, and half extracted a wad. "I don't know," was all that Bernard could reply. "If they have, they haven't published it. But does it seem likely? Would Stern be moving the way he is if they had? But you have nothing to lose by spelling it out to them. It has to be worth a try." with wonder as she contemplated the immensity of creation. "That's my whole point," Bernard told them. "They're. but their smiles and greetings seemed false, not because he doubted their sincerity, but because he himself." As a temporary barracks for the military force based on the surface, the Chironians had made available a recently completed complex of buildings designed as a school, which was intended for occupation later as Canaveral City expanded. It comprised a main administrative and social block, which the Army was using mainly for administrative and social purposes; an assortment of teaching and residential blocks, most of which were being used for billeting the troops, with part of one serving as a Detention Wing; a gymnasium and sports center which had become the stores, armory, and motor pool; and a communal dining hall which was left unaltered. Colman was nonplussed. He shook his head as if to clear ? it. "What--What exactly do you do around here?" Kath's smile became impish, as if she were amused by his confusion. "Oh, you'd be surprised." Kalens smiled at the frown on Celia's. "I guess we buy our own drinks," Hanlon said, draining the last of his beer and setting his glass down on the table. "Looks like it," Stanislaw agreed. "Hanlon's got him," Bernard said to the screen that was showing Kath. "He looks as if he's all right. They've got Swyley too. He seems okay." "Does he expect you tonight?" Stern inquired curiously, although Celia couldn't avoid a feeling that he already knew the answer. She shook her head. "Where are you supposed to be? ". offering something. "Baby, it's okay, see, baby, look." While Alan Jackson filled the jukebox with a melancholy lament about loneliness, Noah fished the. and what you think maybe he really does is have his sweaty, greasy, drooling, lustful way with me." Colman watched for a moment, then turned slowly back and began moving toward the bulkhead door. He didn't feel resentful, nor

particularly surprised. He'd seen it all too many times before. Fallows wasn't a bad guy; somebody somewhere had jumped on him, that was all. "He might know all about how machines work," Colman murmured half-aloud to himself as he returned to the gallery outside the Bomb Factory. "But he doesn't understand how they think." Although the sky was a furnace grate, although Micky was slick with coconut-scented lotion and sweat, followed seemed to be charged with some supernatural energy, as the aura of an elemental spirit might. "Yeah, I heard that somewhere," Leilani replied, picking up her fork..now or whether they'd remember Luki? or admit to remembering him." Toward Stern he felt neither animosity nor affection, which suited him because he functioned more efficiently in relationships that were uncomplicated by personal or emotional considerations. He had no illusions that either of them was motivated by anything but expediency. Stormbel derived some satisfaction and a certain sense of stature from the knowledge that they complemented and had use for each other, with no conflict of basic interests, like the interlocking but independent parts of a well-balanced machine. Stern wanted the planet but needed a strong-arm man to take it, while Stormbel relished the strong-arm role but had no ambitions of ownership or taste for any of the complexities that came with it. Although everybody had been expecting the announcement, a tension had been building as the room waited for the words that would confirm the expectations. Now that the words had been said, the tension released itself in a ripple of murmurs accompanied by the rustle of papers, and the creaks of chain as bodies unfolded into easier postures..Oh, Lord, there's just one door, the sucker's magically locked, all his tricks are thwarted, and he's. The sound of twisted steel scraping across the outside of its hull reverberated throughout the modules stem section as one of the feeder ramps, none of which was retracted, first bent, and then crumpled. The ramp tore open halfway along its length at a section that had been pressurized, spilling men and equipment out into space. The lucky ones-the ones who were wearing suits-could hope to be located through the distress-band transmissions from their packs. The others had no time to hope in the instant before their bodies exploded..best, unless it was being told that she would screw up the rest of her life if she wasn't careful, unless it. "Fear. Shame. And then he realized that Kath was smiling in a way that said there was no need to explain or rationalize anything. Still looking him straight in the eye, she said in a quiet voice that was not for overhearing, "We like each other as people, and we admire each other for what we are. There isn't anything to feel hung up about on Chiron. People who feel like that usually make love, if that's what they want to do." She paused for a second. "Isn't that what you'd like to do?" Little snot, Jay thought to himself and turned the page. The next section of the book began with a diagram of the Centauri system which emphasized its two main binary components in their mutual eighty-year orbit, and contained insets of their planetary companions as reported originally by the instruments of the Kuan-yin and confirmed subsequently by the Chironians. Beneath the main diagram were pictures of the spectra of the Sunlike Alpha G2v primary with numerous metallic lines; the cooler, K type-orange Beta Centauri secondary with the blue end of its continuum weakened and absorption bands of molecular radicals beginning to appear; and MSe, orange-red Proxima Centauri with heavy absorption in the violet and prominent CO, CH, and TiO bands..Lechat nodded reluctantly. "Well, it sounds pretty final, I guess." "Sure," Murphy accepted, and they all began walking. On the way, lay explained the problem to his three friends.. "Then there is no reason for us to allow unseemly haste to lower the quality of the evening," Stern said, sitting forward and reaching with a leisurely movement of his hand for the decanter. "A little time ripens more than just fine cognac. Will you join me in a refill?" Kath suggested a place in town called The Two Moons, which was where she and her friends usually went for entertainment and company, and was just the right distance for a refreshing walk on an evening like this. On the way they passed the house that Colman and his companions had stopped by earlier in the day, which prompted him to mention the painter's robot. "It looked as if it was learning the trade," Colman said.. "How about that?" Hanlon shouted delightedly. "The guy did it!" objection and their cold-eyed persistence is too intimidating to resist. You see guys like this on the TV. That touched at what was really at the bottom of it all. The unspoken suggestion, which Kalens had been implying and to which everybody had been responding though few would have admitted it openly, was that the entire social edifice upon which all their interests depended was threatening to fall apart, and the real attraction of an enclave within a well-defined boundary was More to deter Terrans' leaving than bomb-carrying Chironians' entering. Now that Kalens had come as close as any would dare to voicing what was at the back of all their minds, all the lobbies and factions stood behind him, and Wellesley knew it. If Wellesley opposed, he stood to be voted out of office. So, he concurred, and the resolution was passed all but unanimously.. "At least I didn't catch you playing with yourself. Sunlight had bleached the drapes into shades no. and terrifying than the teeth.. While the red and then the purple dust of twilight settled, Noah remained in the three-bedroom suite., Just as he plunges into the shadows between the vehicles, he hears shouting, people running ? suddenly. "I have. I got cut off with some guys for almost a week in the South African desert once. All you think about is water. You can't describe the craving. You'd cut off your arm for a cup." He paused, and Jay waited with a puzzled expression on his face. "When you've got ~enough to drink," Colman went on, "then you start worrying about food. That takes longer to build up, but it gets as bad. There have been lots of instances of people cannibalizing dead bodies to stay alive once they got hungry enough. They've killed each other over potato peels." "Fifty?"
